## ELDER, FLESHMEADOW AND MORE TO INFERNO 2023

We can announce Elder, Fleshmeadow, Filthdigger, Omnia Moritur, Hulder and Ottone Pesante to Inferno Metal Festival 2023!

### ELDER

Elder is a genre-pushing rock band that melds heavy psychedelic sounds with progressive elements. Formed in a small coastal town in USA in 2006, the band has reinvented their sound over the course of five albums to grow from a stalwart of the doom scene into one of the most unique voices in the rock underground. The band's newest album, "Innate Passage", was released in 2022. Recorded and mixed at Cloud's Hill Studio in Hamburg, Germany during two sessions over the course of 2021, this new album shows

the band's ever-expanding musical vocabulary and joy for sonic exploration as never before. This will be Elder's first time at Inferno Metal Festival!

### FLESHMEADOW

The Oslo-based extreme metal band Fleshmeadow released their debut album "Umbra" in 2016 and got great reviews from critics all over the world. Blending technical death metal and black metal gave the band a unique sound. Their next release, "Daymares" in 2019, clearly showed the strengths that lay within Fleshmeadow. Their music has been described as the bastard child from so different artists as early Gojira to Mayhem to Keep of Kalessin. The band is now currently recording their next release, which will mark the next step of their ambitious evolution.

### FILTHDIGGER

Norwegian Filthdigger bring their filthy old school death metal to Inferno. Brutal lo-fi gory death metal! With members and ex-members from such bands as Ruun, Enter Obscurity and Psykopath the band are no strangers to the Norwegian underground metal scene.

around the massive riffs with piano, synth effects, mellotrons, and huge orchestrations.

### **OTTONE PESANTE**

Ottone Pesante is an Italian trio playing on trumpet, trombone and drums, with a unique and inimitable sound, Ottone Pesante is most likely the first brass metal band in the world. They have success in different musical scenes because they destroyed a lot of boundaries between genres.
